

Curriculum Visions unique song

Building wonders

[Verse]

Wooden beams hold up the sky so high
Metal bends to shape where dreams can lie
Glass lets the sunlight softly break through
Each material has a role to do

[Verse 2]

Clay in the hands of a potter's care
Turns to a vessel we can all share
Fabric wraps us keeps us warm at night
Stone stands steady in the morning light

[Chorus]

We take what's given from earth and sea
Shape it into what we need to be
Every piece has a purpose so true
Different materials bring life anew

[Bridge]

Rubber bends but it won't ever snap
Paper holds the words that close the gap
Plastic molds into shapes that last
Each invention builds upon the past

[Verse 3]

Brick by brick we raise up something grand
Sand becomes glass by a steady hand
Gold and silver shining bright with pride
Nature's gifts with knowledge by our side

[Chorus]

We take what's given from earth and sea
Shape it into what we need to be
Every piece has a purpose so true
Different materials bring life anew
